HEAVY DISCOUNT TO US PEERS

Despite a 145% gain since its October low, the stock remains attractively valued in light of the expected improvement in business conditions in H2. Results are expected to reach their low in H1 and should improve following the new casino law in Colorado (becomes effective in July). Century Casinos is currently trading at 2009e EV/sales of 0.5x and P/BV of 0.4x compared to peer multiples of 1.7x and 1.6x, respectively. Our new estimates include \$25m of non operating assets (entering our DCF valuation), but the lack of the South African operations implies an adjusted net loss in 2009 and 2010. We slightly cut our fair value to \$2.9 per share but confirm our Buy recommendation.

MORE THAN 50% DISCOUNT TO US PEERS

After the sale of the South African and Czech assets (about 1/3 of Century's top line), EBIT or PER multiples have not been relevant. In terms of EV/sales and P/BV, Century offers more than 100% upside compared to its US peers and nearly 100% to our FV per share.

NEW OPPORTUNITIES AFTER THE BOTTOM HAS BEEN REACHED

Operating result is expected to reach its bottom in H1 2009. Starting with July 2 the new legislation (higher betting limits, additional games, extended opening hours) in Cripple Creek and Central City is expected to boost turnover by at least 20% per year. Furthermore, Century's financial result is expected to improve significantly after the closing of the SA sale, which we expect to take place in Q2.

WEAK Q1 FIGURES BUT IMPROVED OUTLOOK

We expect the next share price triggers to come from Q1 reporting on May 11 (probably poor due to weakness of the CAD), the closing of the sale of the SA assets, and the more liberal legislation in Colorado starting on July 2. We confirm our Buy recommendation.

IMPORTANT REGULATORY DISCLOSURES

This research report has been prepared by Oppenheim Research GmbH, a wholly-owned subsidiary of Sal. Oppenheim jr. & Cie KGaA, and/or the research department of Bank Sal. Oppenheim jr. & Cie. (Switzerland) Ltd. And/or Bank Sal. Oppenheim jr. & Cie (Austria) AG (collectively, together with their affiliates, "Sal. Oppenheim").

Sal. Oppenheim's policy prohibits research analysts, strategists and research associates from investing in securities in their sub-industry as defined by the Global Industry Classification Standard, which was developed by and is the exclusive property of Morgan Stanley Capital International and Standard & Poor's. Research analysts, strategists and research associates may nevertheless own such securities to the extent acquired under a prior policy or in a merger, fund distribution or other involuntary acquisition.

Analyst certification

Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that, with respect to each security or issuer that the analyst covered in this report: all of the views expressed accurately reflect his or her personal views about those securities or issuers; and no part of his or her compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed by the analyst in the research report.

Disclosures about potential conflicts of interest.

We refer to the following potential conflict(s) of interest:

Rating system

Securities firms use a variety of rating terms and systems to describe their recommendations. Sal. Oppenheim uses a rating system with the categories STRONG BUY, BUY, NEUTRAL, REDUCE and SELL (see definitions below).

A rating system using such terms as Overweight, Equal Weight or Underweight is not equivalent to our rating system. Investors should carefully read the definitions of the rating system used in each research report. In addition, since the research report contains more complete information concerning analyst's views, investors should carefully read the entire research report and not infer its contents from the ratings alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

The ratings in this report are based on the analyst's expectations of the absolute change in stock price over a period of 6 to 12 months and reflect the analyst's view of the potential for change in stock price as a percentage. The STRONG BUY and SELL ratings reflect the analyst's expected high change in the value of the stock.

The levels of change expressed in each rating categories are: STRONG BUY (> 20%); BUY (> 10%); NEUTRAL (0% to 10%); REDUCE (< 0%); and SELL (< -10%).

The change in stock price results from the difference between the current share price and the analyst's performance expectations, which are generally based on a fair value calculation performed on the basis of a discounted free cash flow model and a key comparables analysis.

In general, updated ratings are provided in connection with material events, such as changes in credit ratings, significant model adjustments and the publication of periodic financial information.

Ratings distribution

The following table discloses, for each of Sal. Oppenheim's rating categories, the percentage of (1) all companies covered by Sal. Oppenheim and (2) companies for which Sal. Oppenheim provided investment banking services during the past 12 months that received such rating.
